## **DETAILED ACTION**

### ***Claim Objections***

1. **Claim 1** was objected to because of informalities. Applicant's Amendments, as discussed below, address the informalities and the objection is withdrawn.

### ***Response to Amendment***

2. Applicant's amendment to **claim 1**, to correct the objected to informalities has been recognized and examined as such.
3. Applicant's amendment to **claims 16 & 22**, to include substantially more descriptive and further limiting claim language, has been recognized and examined as such.
4. Examiner notes Applicant's addition of **claim 24** and results of examination are presented below.

### ***Additional Prior Art of Record***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maki et al. (US 2004/0263603 A1) teaches a similar recording-medium conveying device with a single AC bias voltage applying unit. Maki et al. (US 6,786,590 B2) teaches a similar recording-medium conveying device with a single AC bias voltage applying unit.

### ***Allowable Subject Matter***

6. **Claims 1, 16, & 22** are allowed as amended.
7. **Claims 14-15** are allowed as presented, dependent on **claim 1**.

8. **Claims 17-21 & 23** are allowed as presented, dependent on **claim 16**.

9. **Claim 24** is allowed as added, dependent on **claim 16**.

10. The following is an examiner's statement of reasons for allowance:

11. As related to amended independent **claims 1, 16, & 22** as well as all dependent and further dependent claims, an additional search was conducted based on the amendments to the claim and the existing and additional prior art of record fails to teach or fairly suggest an image forming apparatus comprising all of the specific structural limitations as recited, in combination with and particularly including, a head unit, a conveyance unit comprising a conveyance belt wound around at least two rollers, a charging unit provided in the conveyance unit and configured to receive a first AC bias voltage and apply a charge, based on the first AC bias voltage, a charge eliminating unit configured to receive a second AC bias voltage, an AC bias supplying unit configured to supply said first and second AC bias voltages at selected timings. Furthermore, the limited disposition of the charge eliminating unit in independent **claim 1**, the limited movement distance of the conveyance unit from the charging unit to the charge eliminating unit of independent **claim 16**, and the structural inclusion of a heating unit as claimed in **claim 22** differentiate between the independent claims.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Zimmermann whose telephone number is (571)270-3049. The examiner can normally be reached on Monday - Thursday, 7:00am - 5:00pm.
